Relevant Information Inaccurately Stated, Omitted, or Undocumented in the First Application

Our review found that FBI personnel fell far short of the requirement in FBI policy that they ensure that all factual statements in a FISA application are "scrupulously accurate." We identified multiple instances in which factual assertions relied upon in the first FISA application were inaccurate, incomplete, or unsupported by appropriate documentation, based upon information the FBI had in its possession at the time the application was filed. We found that the problems we identified were primarily caused by the Crossfire Hurricane team failing to share all relevant information with OI and, consequently, the information was not considered by the Department decision makers who ultimately decided to support the applications.

As more fully described in Chapter Five, based upon the information known to the FBI in October 2016, the first application contained the following seven significant inaccuracies and omissions:

1. Omitted information the FBI had obtained from another U.S. government agency detailing its prior relationship with Page, including that Page had been approved as an "operational contact" for the other agency from 2008 to 2013, and that Page had provided information to the other agency concerning his prior contacts with certain Russian intelligence officers, one of which overlapped with facts asserted in the FISA application;
2. Included a source characterization statement asserting that Steele's prior reporting had been "corroborated and used in criminal proceedings,"

End of Chapter Answers

Chapter 1

1. Using the rule of 72, approximate the following amounts. (Obj. 1)
 - a. If the value of land in an area is increasing 6 percent a year, how long will it take for property values to double?
About 12 years (72 / 6)
 - b. If you earn 10 percent on your investments, how long will it take for your money to double?
About 7.2 years (72 / 10)
 - c. At an annual interest rate of 5 percent, how long will it take for your savings to double?
About 12 years (72 / 5)
2. In the early 2000s, selected automobiles had an average cost of \$15,000. The average cost of those same automobiles is now \$18,000. What was the rate of increase for these automobiles between the two time periods?
 $(\$18,000 - \$15,000) / \$15,000 = .20$ (20 percent)
3. A family spends \$34,000 a year for living expenses. If prices increase by 4 percent a year for the next three years, what amount will the family need for their living expenses after three years?
 $\$34,000 \times 1.12 = \$38,080$; or using Exhibit 1-A: $\$34,000 \times 1.125 = \$38,250$
4. Ben Collins plans to buy a house for \$120,000. If that real estate is expected to increase in value by 5 percent each year, what will its approximate value be seven years from now?
 $\$120,000 \times 1.35 = \$162,000$; or using Exhibit 1-A: $\$120,000 \times 1.407 = \$168,840$
5. What would be the yearly earnings for a person with \$6,000 in savings at an annual interest rate of 5.5 percent?
 $\$6,000 \times 0.055 = \330

6. Using time value of money tables (Exhibit 1-3 or chapter appendix tables), calculate the following:
 - a. The future value of \$450 six years from now at 7 percent.
 $\$450 \times 1.501 = \675.45 (Exhibit 1-A)
 - b. The future value of \$800 saved each year for 10 years at 8 percent.

Vocabulary Words

Unit 3.3

- abundant**- more than enough; present in great quantities
- impoverished**- having few resources or little wealth
- ingenuity**- cleverness and imagination
- resources**-
- productivity**- the rate at which goods, services, or commodities are made
- sharecropper**- a farmer who pays a portion or share of his crop to rent the land or farm he uses
- solitude**- the state of being alone
- unearthed**- uncovered; dug up out of the earth
- windward**- exposed to and subjected to the wind
